There are many successful business stories, most of them come from a passion. The Neveplast story begins 20 years ago in the city of Bergamo, from the Bertocchi family's passion for skiing and for the mountain.

Here comes the dream of promoting the culture of winter sports, creating a link between the mountain and the city.

Bringing the snow in the city, making the winter sport practice more accessible to anyone and all year round is our vision.

Thanks to our products, it is possible to recreate the typical winter mood in the most unthinkable places: city centers, shopping malls, beaches and even on the roof of a waste-to-energy plant. Do you want to arrange an innovative event with a strong emotional impact?

Find out which of our products is the best for you. Neveplast offers you a turnkey product, assisting you in every step of the project. From the planning to the final assembly with a customized counseling to satisfy your needs.

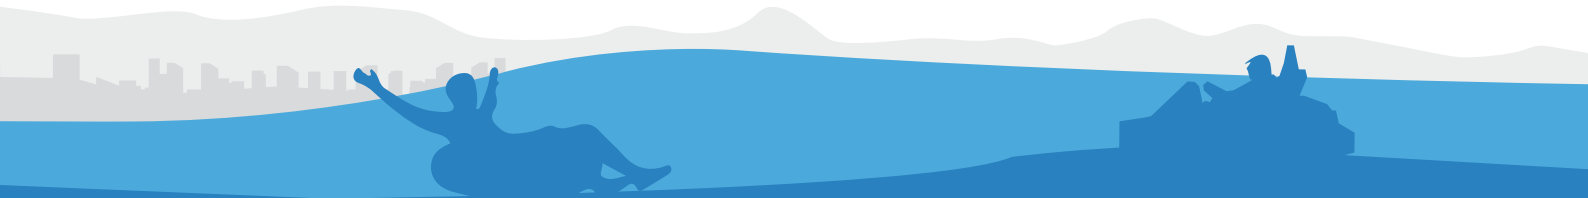

NEVEPLAST FOR EVENTS

All of our products are highly modular and flexible, and they can be installed directly on the ground or, where the natural inclination is not sufficient, on scaffolding structures appositely built.

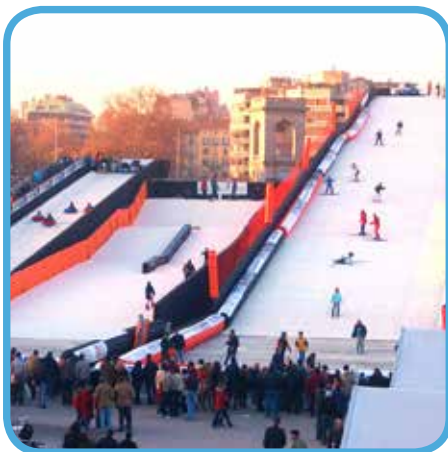

All of our products are compatible with snow, so that they can be made both in summer and in winter.

We propose three main types of product, all of them completely customizable and adaptable to the context and to specific needs:

- SKI SLOPES (ALPINE AND NORDIC)
- SNOW-TUBING SLIDES
- DRIFTING TRACKS

Speed 100 % safe sport snow

ALPINE SKI SLOPES

The Neveplast ALPINE ensures excellent performances, therefore our ski slope is the ideal product to organize events of any kind. In any case, the event will be of great appeal and mediatic impact for the uniqueness of the experience offered.

Neveplast produces and supplies artificial ski slopes, designed for any kind of skier, enjoyable all year round, in the city as well, using normal sport equipment.

Our offer is wide and customizable: slopes to move the first steps on skies, suitable for the little ones, school camps for beginners and non-expert skiers, more engaging and steep slopes, perfect also to organize trainings or funny challenges.

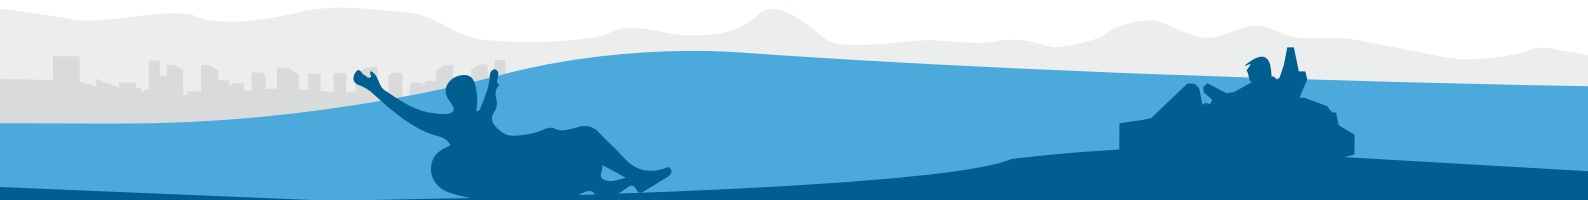

And that's not all! We create snowparks, equipped with boxes and rails, where movements are natural and the take-off on kickers is precise, for an event dedicated to freestyle.

Do you really want to make your event spectacular? The right product is JUMP, the ski slope to leave anyone astonished looking at athletes jumping, making tricks and landing on the inflatable mattress.

Neveplast is the ideal partner to promote the culture of the mountain and winter sports, starting from the city, even if there isn't any snow.

Typology of ski slopes:

- SCHOOL CAMP
- SKI SLOPE
- SNOWPARK/FREESTYLE
- JUMP

customization passion no water

Speed 100 % safe sport snow

NORDIC SKI SLOPES

The installation of a Nordic ski slope has a strong mediatic impact, with limited costs, also ideal in flat areas. The assembly is easy and quick as well, that's why a Nordic ski slope is particularly suitable for short-term events.

Cross-country track, classic technique

The ski slides inside binaries made by Neveplast. The track in classic technique is ideal for events with the purpose of bringing new people closer to the discipline. It can be used easily also by those who never tried skiing in their entire life.

Cross-country track, skating technique

Track to practise skating technique. This type of track, conceived for expert skiers, is ideal also to organize challenges and competitive events in an urban context, all the year round.
