We have been manufacturing Neveplast patented ski slopes in synthetic surface since 1998, in order to realize the dream of practicing winter sports anywhere, all year round, at low cost and using normal equipment. Thanks to its experience with more than 2,300 installations worldwide, Neveplast supports customers from concept to realization of the tracks, recommending tailored and feasible solutions. We create turn-key projects with customers that meet their specific needs.

WORLDWIDE LEADER IN ARTIFICIAL  
SKI SLOPES AND SUMMER TUBING

on quality innovation research

# SPORT

The Sports line was created with the intention to broaden the winter sports (alpine skiing, snowboarding, cross country skiing), which may be practiced even in the summer.

## ALPINE - FREESKI

Alpine skiing – snowboarding – telemark

## XCOUNTRY

Nordic skiing – free and classic technique

## LIFT

Loading and unloading areas

Ideal for:

ENCOURAGE A SPORTS CULTURE

raising the awareness of sports for educational purposes

TOURIST PROMOTION

for facilities that want to enrich attractions for tourists

COMPETITIVE PRACTICE

to meet the needs of professionals to train no matter the weather

# NEVEPLAST PRODUCTS

## FUN

The Fun line responds to the growing leisure sector demand for appealing attractions characterized by low operating costs and high emotional impact.

### TUBBY

Snow tubing summer winter

Ideal for:

### SKIDDY

The surface for drifting with karts

TOURIST FACILITIES

THEME, AQUATIC AND ADVENTURE PARKS

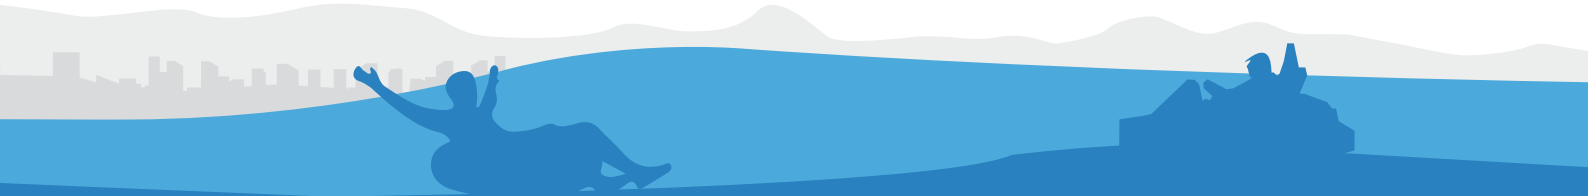

SKI RESORTS

REGIONAL AND TOURISM PROMOTIONAL EVENTS

SHOPPING CENTRES AND MEETING PLACES

### SKID

The new frontier of drift for the youngest

# neveplast **\*SKIDDY**

For the fans of drifting, the kings of sliding but even for those people with less experience with counter-steering and motors, Neveplast presents a revolutionary concept linked with the world of go-karting: SKIDDY.

Created by the symbiosis between the concept of artificial ski slopes produced by Neveplast and go-karts, SKIDDY is an indescribable opportunity for managers in the recreational field, giving the chance to develop original place of leisure where the emotion of sliding and drifting as on the snow is recreated. A proposal aimed at a broad target: an unique emotion of a secure and fun slide affordable to everyone both in winter and summer.

The SKIDDY experience is aimed for a broad target group: total excitement in a fun and secure set-up, affordable to everyone, operational in every season of the year.

SKIDDY consists in the realization of a Neveplast covering surface, specially designed material with unique sliding properties in dry conditions and with high level of wear resistance. The initial investment is recovered in a very short time thanks to the reduced costs of the realization, management and release from seasonality. With SKIDDY you can swerve, drift, reverse steer and overtake on a low-adhesion surface but without ice or snow.

SKIDDY can be installed regardless of location, as mountains, the city or the beach. The temperature does not represent a problem and the "drift", the controlled skid, could be realized in total safe conditions.

100% safe high hourly capacity high flexibility

# EXPERIENCE ALLROUND DRIFTING WITH SKIDDY!

# SKIDDY TRACKS

100% safe high hourly capacity high flexibility

SKIDDY tracks do not require large dimensions. The layout of the track is carefully drawn by our technical team in order to maintain the go-kart in transverse position enjoying the thrill of the drift! The installation dimensions range from Mt. 100 to Mt. 200 in length, occupying an area of minimum 800 square meters.

SKIDDY surface is composed by highly modular panels that permit to realize a safe and fun circuit in a short period of time, in line with the customers requirements. The SKIDDY track can be realized on any compact and homogeneous surface and can be installed permanently or temporarily, both indoor and outdoor.

Everyone can experience the thrill of SKIDDY, adults and children, from the most to the less experienced.

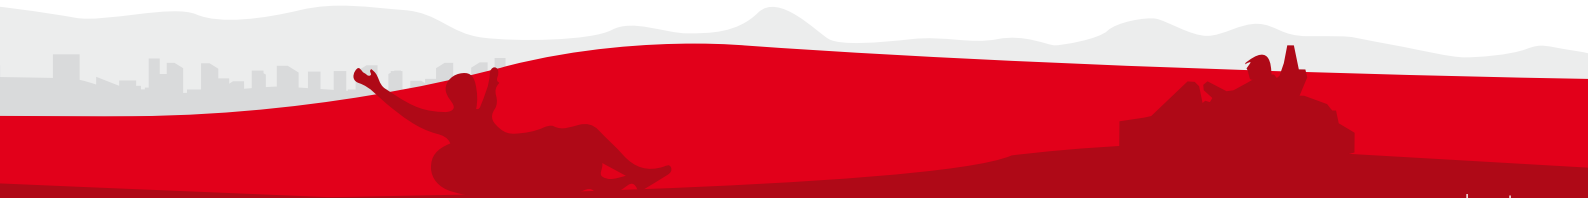

The advantages of SKIDDY are:

- High safety standards.
- Usable with fuel or electric kart.
- Very low maintenance and operating costs.
- Low wear of tires and of mechanical parts.

You can choose different kind of SKIDDY realization:

SKIDDY INDOOR  
SKIDDY OUTDOOR  
SKIDDY FOR THEME PARKS  
SKIDDY CUSTOM

Let yourself be inspired by the examples in the following pages and realize with us your SKIDDY track.

# SKIDDY INDOOR

SKIDDY indoor circuit can be installed in shopping malls, entertainment venues or specially created tensile structures. The design developed together with the Neveplast technical team includes even the boxes and the “public areas” to engage pedestrians.

It can be mounted and dismantled easily; ideal even for events.

100% safe high hourly capacity high flexibility

# SKIDDY OUTDOOR

SKIDDY outdoor circuit is realized in open space. Skiddy basic features remain unchanged regardless of weather conditions. Feasible everywhere, both in urban and mountainous environments, allowing installation to be used throughout the year.

It can be mounted and dismantled easily; ideal even for events.

# SKIDDY FOR THEME PARKS

The SKIDDY circuit for theme parks is a unique attraction and it permits to feel the emotion of the thrill of drifting in places especially designed for leisure. The tracks fit for any available space and combine perfectly with the other attractions in the park, providing the drivers a unique experience.

The tracks are designed to be sensational and in line with the atmosphere of the park where Skiddy is installed.

It can be mounted and dismantled easily; ideal even for events.

100% safe high hourly capacity high flexibility

# SKIDDY CUSTOM

The SKIDDY custom circuit is completely customizable according to customer requirements.

The track is designed to fit for the available space, ensuring safety and fun.

Not only you can choose the color and the configuration of the circuit, but with Skiddy custom you can even customize the scenic design that frames the track in order to create an engaging environment via our partner: Kinetic Creative.

# THE CONCEPT

100% safe high hourly capacity high flexibility

SKIDDY consists in the realization of the Neveplast surface that permits to simulate the common drift of go-kart as on the snow.

The circuit is designed as a traditional track of go-kart, including even barriers and accessories, in order to drift in completely safe condition.

What Neveplast will provide:

**NEVEPLAST SKIDDY** - Material designed for Alpine skiing and snowboarding with unique characteristic of slipperiness in dry conditions and with exceptional wear resistance permitting a safe drifting experience.

**SAFETY BARRIERS** - The best performing on the market. We rely on leaders in this industry to provide safety barriers with high quality standards permitting to create an attractive track.

**GO KART – SKIDDY** tracks can be used with electric or fuel karts. With electric karts it is possible to regulate the performance of the kart, enabling their use by both big and small racers, maintaining a high level of safety and taking care of the environment. Any customized solution is realized with specialist go-kart manufacturers.

Barriers and Go-karts can be purchased directly or through Neveplast.

**MAINTENANCE** - The use of the Neveplast surface guarantees enormous benefits to the ordinary go-kart management, minimizing the costs. The experience allows us to point out that tires do not need to be changed because the tire wear is minimum and even breaks are completely negligible compared to the usage on traditional tracks.

100% safe high hourly capacity high flexibility

neveplast  
**\*SKID**

y accessories customization customer care

SKID is a “turnkey” product that responds to the growing demand of delivering all-round and complete installations, easily and quickly assembled, even within a small footprint.

SKID is the new concept invented by Neveplast for drifting with mini go-karts. Mini refers to a target group of 7-15 years old.

The concept arises from the experience of SKIDDY, specially designed for small areas ranging from 300 Sqm. to 500 Sqm. in order to enhance the available space.

SKID is an innovative, easy-to-mount and disassembled product, designed for small spaces, that can be installed anywhere. Thanks to the “turnkey” formula we provide

the track with the surface for drifting, barriers and mini go-kart, ready to be installed and used! The package also includes various accessories and the design of the track in order to adapt it to the available space.

SKID is a all-round product that can be installed indoor, in places like shopping malls or sports centers and even in open spaces.

It is used both during summer and winter because it is highly resistant and the Neveplast surface is compatible with snow.

Ideal for events and for temporary exhibition, SKID is easily assembled and dismantled in 2/3 days.

100% safe high hourly capacity high flexibility

MINIMUM SPACE  
MAXIMUM FUN

neveplast  
**\*SKID**

y accessories customization customer care

# SKID TRACKS

SKID circuits have been designed for minimum 300 square meters and for maximum 500 square meters of space. Each package includes: the design of the track, the Neveplast surface for drifting as on the snow, the mini go-karts developed to be highly performing on the Neveplast surface and safety barriers.

Specially engineered karts developed for Neveplast with double engine and boosted performance guarantee similar performance to SKIDDY.

SKID can be assembled in few hours and it is fixed on ground using specific screws provided according to the type of the flooring where the track is fixed. Ease of transportation and assembly makes SKID an ideal product for events or temporary exhibitions.

Each track includes a box area for go-kart storage useful for when karts are not used.

Starting from the base models, Neveplast can develop a unique SKID circuit together with you!

You can choose between different SKID tracks sizes:

SKID 300  
SKID 400  
SKID 500  
SKID CUSTOM

Let yourself be inspired by the examples in the following pages and realize with us your SKID track.

neveplast  
 **SKID**

y accessories customization customer care

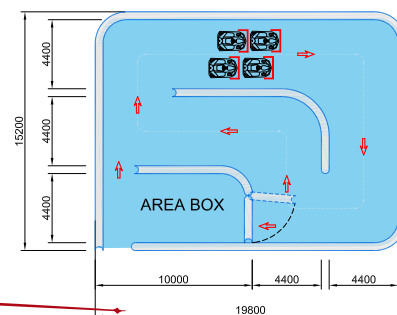

# SKID 300

The most compact of the range, SKID 300 is designed for a space of 300 square meters.

SKID 300 includes:

- Neveplast surface.
- 4 mini go-karts with two batteries.
- 2 sets of extra batteries for each mini go-kart.
- Barriers.
- Accessories for mini go-karts.

100% safe high hourly capacity high flexibility

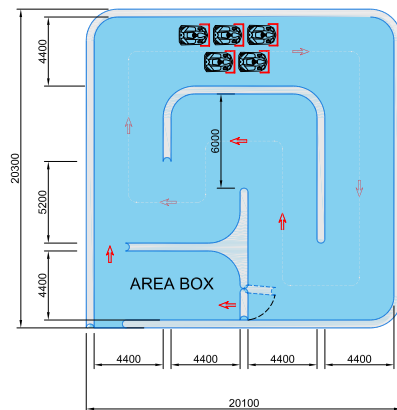

# SKID 400

SKID 400 is designed for a space of 400 square meters.

SKID 400 includes:

- Neveplast surface.
- 5 mini go-karts with two batteries.
- 2 sets of extra batteries for each mini go-kart.
- Barriers.
- Accessories for mini go-karts.

neveplast  
**\*SKID**

y accessories customization customer care

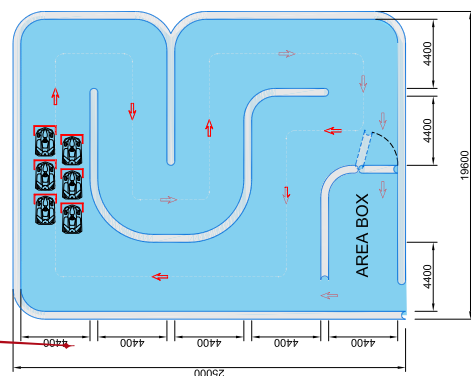

# SKID 500

The largest of the range, the SKID 500 is designed for a space of 500 square meters.

SKID 500 includes:

- Neveplast surface.
- 6 mini go-karts with two batteries.
- 2 sets of extra batteries for each mini go-kart.
- Barriers.
- Accessories for mini go-karts.

100% safe high hourly capacity high flexibility

# SKID CUSTOM

Customize your SKID circuit! You can choose the color of the surface, barriers and mini go-kart graphic!

Enjoy customizing the theme of the circuit, we support you for the creation of an unique and unmatched track!

Depending on the available space, we will draw the layout respecting all your desires and requirements, including barriers and mini go-karts. You choose the number of go-karts!

# MINIKARTS

SPECIALLY DESIGNED AND MANUFACTURED WITH DOUBLE ENGINE TO DRIFT.

IDEAL FOR CHILDREN: EQUIPPED WITH A DUAL PEDAL THAT FACILITATES THE DRIVING.

POWER: USES TWO 24 VOLT 400 WATT MOTORS.

CHARGING AT 24 VOLTS.

CHARGING TIME: 8 HOURS.

100% safe high hourly capacity high flexibility

DIFFERENT SPEEDS - MAXIMUM SPEED 20 KM / H.

RUNNING FORWARD AND BACK.

SOUND REPRODUCTION.

BUTTONS ON STEERING WHEEL  
TO FACILITATE THE DRIFT.

REMOTE SETTING.

y accessories customization customer care

# VERSATILITY

SKID is a concept that won customer satisfaction thanks to the ease of the management; one staff member can coordinate up to 8 mini go-karts at the same time.

Thanks to the supplied remote control you can supervise the speed, the time, the sound and the coin case. The coin case is useful to monitor the use of the installation and to make prevision and reportage.

SKID has a special system that permits to stop the race always in the same position, close to the box, once the racing time is over.

Easy and fast method to change the battery: estimated time in one minute thanks to a quick coupling.

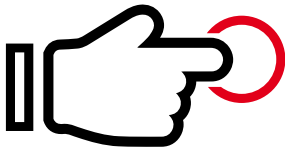

100% safe high hourly capacity high flexibility

## DIFFERENT KINDS OF USE:

### **TOKEN**

Enter the coin and the go-kart will start for the pre-set time. At the expiration of the time the go-kart automatically stops close to the box.

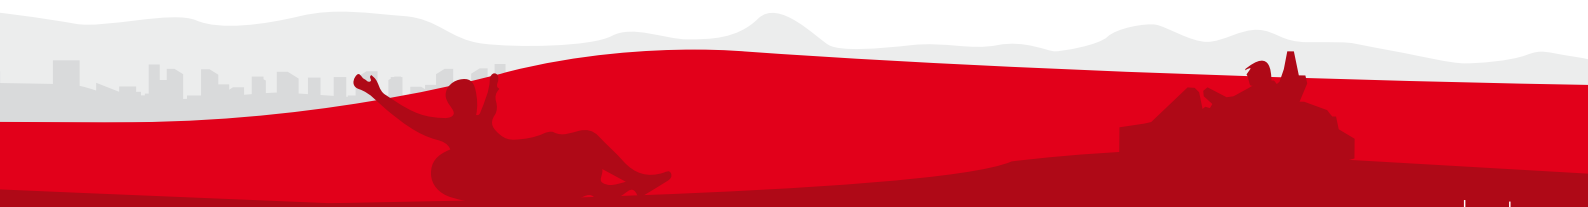

### **BUMPER CARS**

Insert the coin and the kart will turn on but it will NOT start until the operator presses START on the remote control. At the expiration of the time the kart stops close to the box.

### **ACCELERATOR**

The kart start to move pressing the accelerator pedal. The time function is disabled and the operator can stop the kart pressing the button "STOP".

We believe that making excellent products is essential. However, it is equally important to offer an efficient and punctual service. This is why we take particular care over the production, delivery and materials assembly phase.

Also, thanks to active and constant relationships management, we focus on the expectations of our customers and make every effort to fully satisfy them, providing a complete “turnkey” service.

# NEVEPLAST ASSISTANCE

## PRE SALE

Our team of expert designers guide you during all the definition phase, recommending the ideal solution according to your needs, structural feasibility and expected performance levels.

We ensure the following for customers:

PROJECT FEASIBILITY STUDIES  
DESIGN  
FAST AND PRECISE REALIZATION TIMES

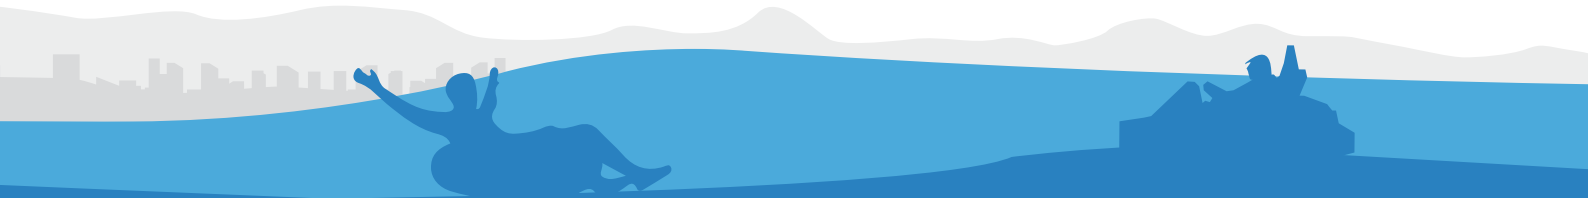

## AFTER SALE

Neveplast technicians will support your workers in the installation of the track on site, ensuring precise and accurate assembly in short timescales.

We provide:

SUPPORT AND ASSISTANCE DURING INSTALLATION  
AND THE OPENING OF A FACILITY UNTIL FINAL  
COMPLETION OF EVERY DETAIL

ON-SITE TRAINING AND TECHNICAL TIPS FOR  
PROPER OPERATION AND MAINTENANCE.
